Department of Software and Information Systems
Faculty of Information, Communication and Digital
Technologies
University of Mauritius

Enterprise Systems

Enterprise system or
an **ERP** (Enterprise Resource Planning) system

An integrated enterprise-wide business application

ERP5

Why Enterprise Systems for Africa?

Organisations across Africa struggle to effectively implement and use enterprise systems mainly due to:

- A lack of IT skills, in particular:
 - Business Analysts and
 - ERP consultants
- A lack of management understanding of enterprise systems
 - Accountants
 - Engineers
 - General Management

The impact of ERP skills shortages

Accpac	19	R 397 786
Microsoft Dynamics	29	R 515 571
Oracle Applications	27	R 696 185
SAP R/3	45	R 671 976

Learning ERP has its rewards

2014-2016 UoM Student Feedback

- Career in ERP has the option of transitioning their career across the organisational functions and what makes it so interactive is the new technology and new method being used and that keep on evolving and changing when it concerns ERP
- Knowledge on ERP and business perspective through Zambikes case study and hands-on

July 2017

- The ES fundamental course was a very challenging and enriching experience for me. I can now proudly say that i have at least a basic knowledge about SAP ERP system.
- I expect that this may help me in the job market, if ever I join a company which use an ERP system.

Companies such as Deloitte recognizing ESEFA

Benefits of the Short Course

- Integrated Enterprise Systems (ES) courses are a meaningful supplement to business and IT study programmes at universities. These courses provide a comprehensive understanding of business processes and enterprise systems.
- Beyond that, specific application knowledge of SAP ERP software is highly relevant for all fields of business activity of the most diverse enterprises.
- Enterprise systems qualified personnel are in high demand and are particularly sought after by organizations - this education will therefore enhance student marketability and prepare students for project and management positions in complex working environments.
- ESEFA-Partner universities across Sub-Saharan Africa aim to integrate the ESEFA curricula into existing study programmes and will also offer a 5-day short course 'ES Fundamentals for Business' to students.
- The short course exposes students to integrated business processes through its workshop based teaching

Benefits of the Short Course (Cont.)

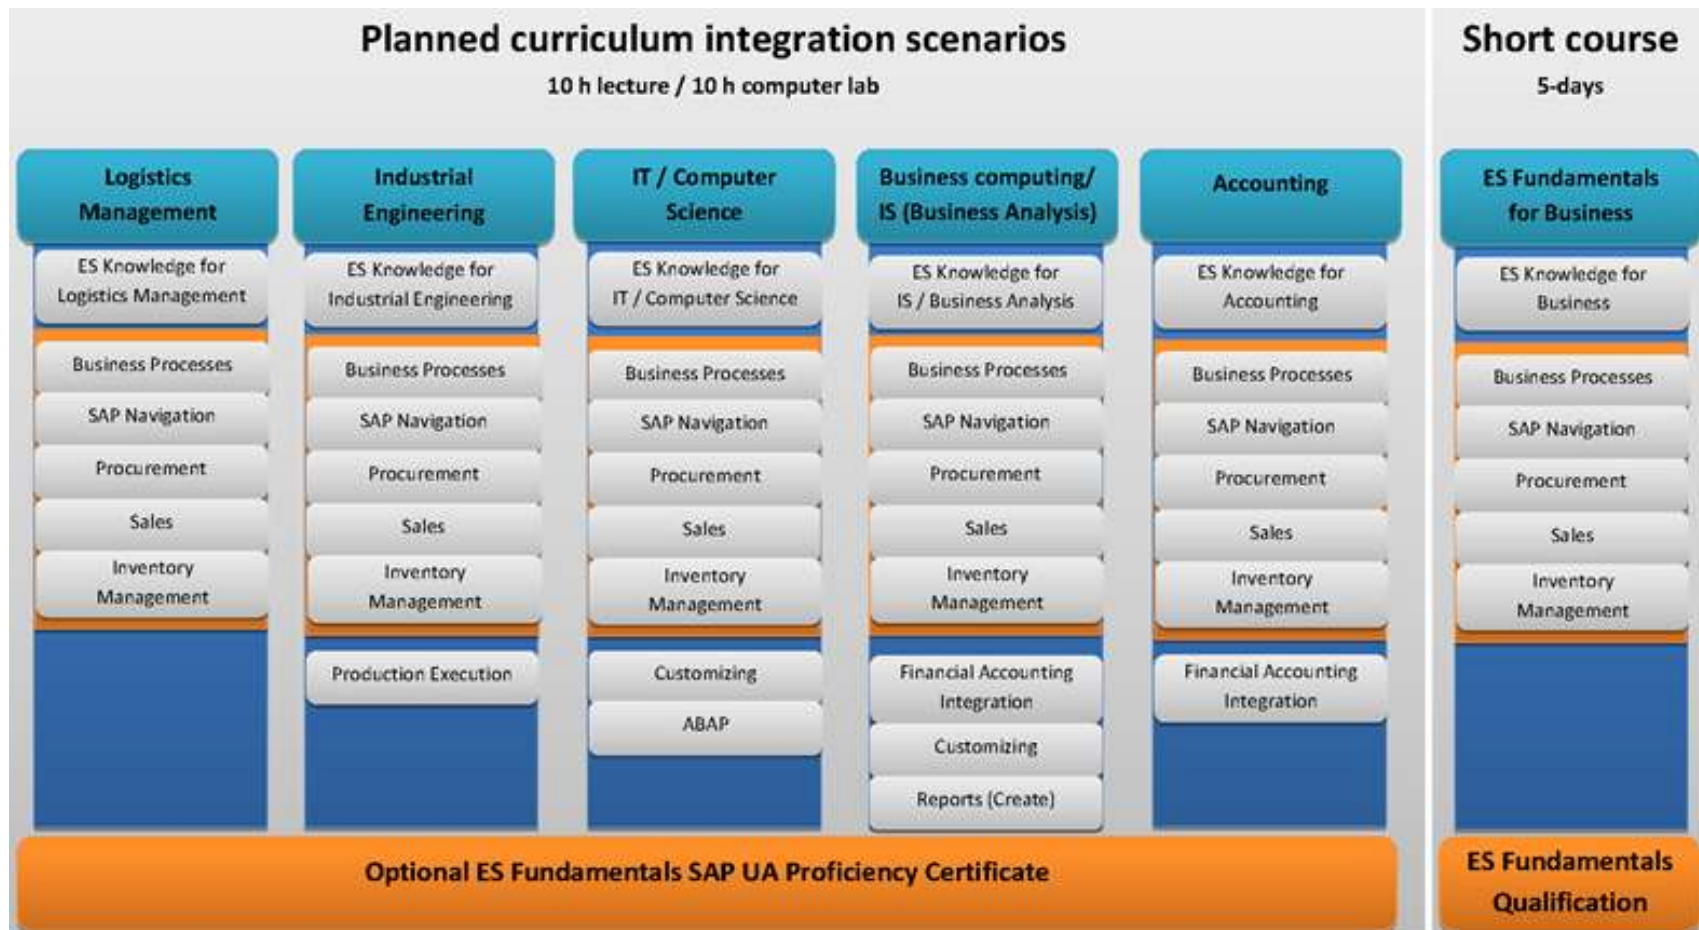

- Students get hands-on experience on the SAP ERP system where they are able to run similar transactions as would occur in a usual business scenario.
- Students will be able to take an optional ‘ES Fundamentals with SAP’ qualifying examination at the end of a course. SAP University Alliances (SAP UA) issues proficiency certificates to students who successfully pass the examination. These certificates give students a significant advantage in the job market.
- Students may attend these courses and write the examination if they are registered students at a recognized tertiary institution and up to three months after they have graduated from a tertiary institution. Students from any other (non ESEFA-Partner) university may attend the short course at an ESEFA-Partner university in their region.

Programme/Project essentials

- Sustainable ES/ERP education in sub-Saharan Africa
 - GBI-based curriculum adapted for the African context
 - ES Fundamentals short course (core curriculum) and modularized integration scenarios for multiple disciplines / study programmes
 - Case studies and exercises in SAP teaching system (GBI client)
 - Model company based on real-life ZAMBIKES bamboo bike factory
- Enterprise Systems qualifications
 - SAP UA approved examination with proof of competency/attendance for students
 - Lecturer education by ESEFA centre (UCT, Dept of Information Systems), providing SAP UA proof of competency / qualifying to teach ES Fundamentals short course
- ES teaching academic network
 - One pilot partner university per country (10 Sub-Saharan countries)
 - Community of ES lecturers for content-related exchange and feedback
 - Access to the learning-content platform
 - Optional participation in curriculum-related research

ESEFA curricula for integration & short course

Programme/Project essentials

- Minimum for SAP UA ES Fundamentals proficiency certificate
- 5 day course
- **Costs**
 - Rs4,500 (including exams and course cost)
 - Exams run by University of Cape Town (UCT)
 - Students passing the exams will obtain a Certificate of successful completion from SAP University Alliances which can be verified on:
 - http://www.lms.esefa.ac.za/theme/esefa/layout/certificate_search.php

A few SAP Customers in Africa's economy
