

## **Vacancy: Microbiologist**

### **About the job**

#### **Company description**

MC-Biotech Ltd is a pharmaceutical company based in Goodlands. The manufacturing plant became operational in November 2023 with a vision of becoming the preferred global partner in pharmaceutical manufacturing. Our motto, 'Your health matters', reflects our commitment to excellence in healthcare and improving patient well-being. We strive to offer high quality and affordable pharmaceutical products for the Mauritian and African markets.

#### **Role Description**

This is a full-time on-site role for a Microbiologist. The Microbiologist will be responsible for conducting microbiological testing, including quality control testing and environmental monitoring. The responsibilities include:

- Conduct routine and non-routine microbiological testing of raw materials, in-process samples, finished products, and environmental samples.
- Implement and oversee environmental monitoring programs to ensure the cleanliness and sterility of the manufacturing facility.
- Participate in investigations of deviations, out-of-specification results and incidents related to microbiological aspects. Conduct root cause analysis and implement corrective and preventive actions.
- Maintain accurate and detailed record of all microbiological testing activities, ensuring compliance with regulatory requirements – GLP, GMP, and ISO standards.
- Work closely with cross-functional teams, including Quality control, Quality Assurance and Production, to ensure alignment with quality and safety standards.

#### **Qualifications and Skills**

- Bachelor's degree in microbiology or any related fields.
- Experience with microbiology testing methodologies.
- Laboratory skills and knowledge of laboratory equipment.
- Experience in Good Manufacturing Practices and Good Laboratory Practices.
- Competent in problem solving and microbiological risk analysis.
- Highly proficient in time management and administrative tasks.
- Technical report capability.
- Proficient in written and spoken English.
- Ability to work under pressure.
- Computer literate – Microsoft office (Word, Excel, Outlook, PowerPoint, etc.).
- At least 5 years of experience would be an advantage.
- Experience in the pharmaceutical industry is a plus.

## **Vacancy: Chemist**

### **About the job**
