

Job Opportunity: (Trainee) Mechanical Engineer

Inspired by our passion and driven by our commitment, we, at Zambezi Group, operate in several key industries including agritech, renewable energy, construction solutions, and hospitality & entertainment.

We are passionate about what we do, and we pride ourselves on delivering high-quality products and services that create value for our clients.

Zambezi Cosmix is a mobile concrete mixer. It mixes and delivers concrete on-site, offering efficiency and flexibility for construction projects. Its mobility allows it to access various locations, making it useful for different types of construction work. It's equipped with a mixing drum that enables the preparation of concrete directly at the construction site, reducing logistical challenges.

Our head office is situated at Accuris Business Centre, 1st Floor, 51A RJT Building, 51 Rue du Savoir, Cybercity, Ebene, Republic of Mauritius

We are currently looking for degree holders in Mechanical Engineering to be considered for this position.

Duties and Responsibilities:

- **Customer requirements:** Assist the sales and marketing team in understanding customer requirements, providing technical insights, and contributing to the marketing and sale of products and services, scheduling, budgeting, and resource allocation.
- **Quality Assurance:** Implementing quality control measures to ensure that all mechanical components meet specifications and standards. Conduct routine maintenance, diagnose issues, and perform repairs on heavy equipment, ensuring optimal functionality and client satisfaction.
- **Customer satisfaction:** Build strong relationships with clients, addressing their inquiries, providing technical support, and ensuring a high level of customer satisfaction.
- **Maintenance Planning:** Maintain accurate records of equipment maintenance, repairs, and service reports. Compile technical documentation for client reference and internal use.
- **Technical Support:** Providing technical support, troubleshooting mechanical issues, and proposing solutions for continuous improvement.
- **Safety measures:** Conduct site inspections to monitor construction progress and ensure adherence to safety and quality standards.

ZAMBEZI GROUP

- **Compliance:** Ensuring compliance with relevant safety regulations and standards in the design, manufacturing, and testing of products and services.
- **Research and Development:** Conducting research on industry trends, new technologies, and advancements in heavy equipment.
- **Customer Engagement:** Collaborating with customers to understand their needs and preferences, incorporating feedback into products and services.
- **Supply Chain Management:** Working closely with suppliers to ensure timely delivery of quality components and equipment.

Qualifications/Skills/Competencies:

- Bachelor's degree in Mechanical Engineering or related field.
- Strong mechanical aptitude and a passion for heavy equipment.
- Excellent problem-solving and analytical skills.
- Effective communication and interpersonal skills.
- Ability to work collaboratively in a team environment.
- Eagerness to learn and a proactive approach to problem-solving.
- Understanding of construction industry practices and standards.
- Commercial awareness, including an understanding of target user and market
- Ability to work under pressure

This role requires a combination of technical expertise, project management skills, and a strong understanding of construction principles and industry regulations.

Duration: Contractual & Full Time

Experience: Not compulsory but would be an advantage for this position

Remuneration: Negotiable (according to qualification and years of experience)

Working Days/ Time: Monday to Friday - 8am to 5pm (may be requested to work on weekends or public holidays depending on business needs).
