

Grayson is hiring a Maintenance Technician Automation

Grayson is a Global Talent Provider and we currently have several openings for our clients based in Mauritius, with operations across Europe, Middle East and Africa in the various sectors.

Situated at **Industrial Zone Road, Vacoas-Phoenix**

Duties are as follows:

Responsibilities:

- Ensure the installation and commissioning of equipment for the automation part.
- Carry out a rigorous follow-up in terms of preventive and predictive maintenance on automation installations.
- Actively contribute to the realization of various company projects by being an active member of the company's project team.
- Actively participate in the modernization of equipment and production methods by providing knowledge and skills in automation.
- Be a technical support to the maintenance teams during breakdowns related to automation.

Requirements:

- Holder of a Bachelor's degree in Industrial Maintenance (specialization in Automation) or in Automation Engineering.
- Minimum 2 years of experiences in similar field.
- Experience in an industrial or robotic environment would be an advantage.
- Rigorous and discipline (rigor in the application of electrical safety procedures and instructions).
- Ability to analyze and diagnose.
- Available to work "On Call".

We are currently looking for degree holders in Industrial Maintenance / Automation Engineering.

Duration: Full-Time Permanent

Experience: (Optional) Fresh graduates with previous internships in Industrial Maintenance / Automation Engineering

Remuneration: As per market rates

Working Days/ Time: N/A
