Junior Full Stack Developer Internship

Ready to dive into real-world web development and sharpen your skills alongside a passionate team?

As a **Junior Full Stack Developer Intern**, you'll contribute to building modern web apps, learn from experienced developers, and get hands-on with tools like **Laravel**, **Vue.js**, **Docker**, and **Git**.

What You'll Do:

- Help build and maintain web apps using open source tools
- Assist with back-end (REST APIs, databases) and front-end (responsive UIs)
- Explore DevOps practices with **Docker** and **CI/CD** pipelines
- Test, debug, and review code in real projects
- Collaborate with our team and bring your curiosity to the table

Your Profile:

- Communicates clearly in English or French
- Curious, motivated, and detail-oriented
- Team player who loves learning and improving
- Some experience with **Laravel**, **PHP**, **Vue.js**, or similar
- Basic SQL/database knowledge
- Interest in Linux, containers, and modern dev workflows

What's In It for You:

- A real **startup vibe**
- **Delicious chef-made lunches**
- **Learning opportunities** & mentoring
- Team events & good vibes
- Flexitime & work from home options
