## Career Opportunity for Recent Graduates in Computer Science & Artificial Intelligence

Identical Pictures Ltd – Exploring the Future of Filmmaking through Technology

Identical Pictures Ltd, a leading film production company based in the North of Mauritius, invites applications from recent graduates of Mauritian universities holding a degree in Computer Science with a strong focus on Artificial Intelligence.

We are at the forefront of integrating advanced technology into the filmmaking process — from website architecture and digital infrastructure to cutting-edge AI research in post-production workflows. Our projects span from traditional cinematography to innovative AI-powered visual effects, making this a unique opportunity for graduates interested in applying technical skills to creative industries.

### Key Areas of Work and Research

The selected candidate will be actively involved in:

- Website Development & Servicing
  - Designing and maintaining professional-grade, secure, and scalable websites
  - Implementing high-performance hosting and content delivery systems
  - Integrating e-commerce, portfolio, and digital asset management features for film production
- Artificial Intelligence & AI Agents
  - Researching and deploying AI tools for automation in filmmaking processes
  - Developing AI agents for project management, marketing, and client engagement
  - Exploring generative AI applications for script analysis, editing support, and creative ideation
- Social Media Strategy & Digital Marketing
  - Building integrated campaigns to promote productions and film-related content
  - Using AI-driven analytics to optimise reach and engagement
- Film Post-Production Innovation
  - Working alongside Jonathan Symmonds, our Head of 3D Visual Effects — known globally as the lead animator of the dragons in Game of Thrones and House of the Dragon, and a key artist on Avatar and other major films
  - Applying AI in motion capture, VFX pipeline optimisation, and automated editing

Identical  
Pictures

- Contributing to long-term R&D into the use of AI for high-end cinematic content creation

#### Candidate Profile

We are seeking a graduate who:

- Demonstrates strong technical competence in programming, web technologies, and AI systems
- Has a clear understanding of emerging trends in machine learning, computer vision, and generative AI
- Is curious about cross-disciplinary applications of technology in creative industries
- Possesses excellent problem-solving skills and the ability to work independently
- Is eager to engage in forward-thinking research in the convergence of AI and filmmaking
- Resides in the North of Mauritius or is willing to relocate

#### Position Details

- Start Date: From 1st September 2025
- Location: North of Mauritius
- Contract Type: Full-time
- Development Path: Direct mentorship under world-class VFX professionals and filmmakers, with opportunities to co-lead future AI innovation projects

This position offers more than just a job — it is an entry point into the next generation of film production, where technical expertise and creative vision converge to define new possibilities.
